New Methods and Technologies for the post pandemic School Education System to
counter learning obstacles

CANVA STUDENTS WORKSHOP

Seyla Oncel - Huseyin KARAKAYA

06.06.2024

On June 6, 2024, a 40-minute workshop was conducted with our students in the Computer Laboratory. The workshop was delivered by Seyla Öncel and Hüseyin Karakaya.

It was explained that Canva is a free web-based design application that helps you prepare various visuals such as infographics, posters, presentations, invitations, cards, advertisements, or social media posts in a professional manner.

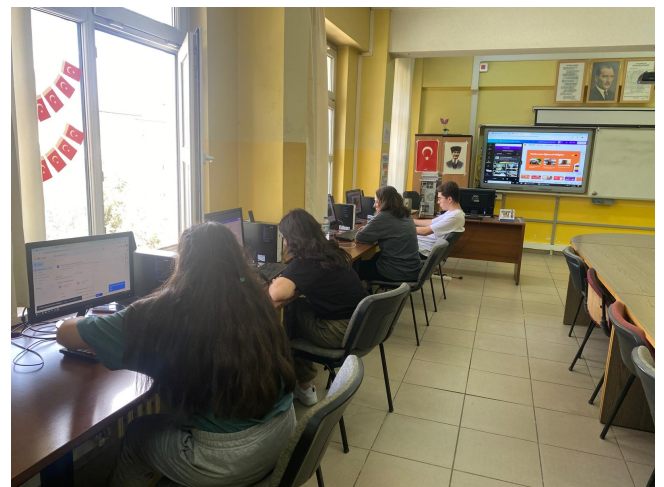

It was demonstrated that Canva works seamlessly in Chrome, Firefox, Safari, and the new Edge browsers without the need for any plugins or software installations on computers, providing all its functionalities.

It was shown how Canva can be used on mobile devices both through browsers and by downloading the Canva application from the Apple App Store or Google Play Store.

It was demonstrated how to log in and use Canva for registration and usage. The menus of Canva were introduced, and an example application was created.

It was shown how to export the created projects. Each student created an application, and their projects were showcased within the class.
